RATIONALE

The Practice Framework provides a shared understanding of how the mission statement, “To support individuals, families and strengthen our communities” is enacted in all the services and programs of Encircle Ltd

POLICY STATEMENT

Encircle works within a Strength Based Framework in all interactions with the community it supports. A Strength Based Framework works alongside people to:

- identify and build on their competencies, resources and capacities rather than focus on perceived deficits
- identify and build on change that is naturally occurring and within the individual's control
- acknowledge that people are experts in their own lives, and uses language that reflects this
- see the problem as the problem, rather than the individual or group as the problem
- assist people to define their aspirations and goals and focus on the future
- recognize that change is constant and inevitable
- support self determination through genuine choice and the right to participation, inclusion and consultation

At an organisational level and at a board (governance) level this influences processes, including how we evaluate, give and receive feedback, work collaboratively, make decisions and engage with new ideas. It also facilitates a mutual learning environment that values self-reflective practice.

ENCIRCLE'S WORK IS

Community development oriented

The term "community" refers to both geographic communities and communities of interest:

- geographic communities i.e. people who identify with geographic areas
- communities of interest i.e. people who share a common history, culture, religion, experience or particular interest.

Community development strengthens individuals and groups to affect change in their own communities by engaging with others and building the skills and tools they need to bring about the desired change. A community development approach:

- involves individuals, families and communities in planning, direction setting, decision making and actions that impact on them
- builds the capacity of individuals, families and communities to address and find solutions to issues, and to set and achieve goals
- works collaboratively to achieve agreed outcomes

Child and young person centred

A child and young person centred approach means that children and young people are:

- at the centre of the process
- treated with respect and dignity
- given appropriate opportunities to participate and to be listened to
- supported and involved in developmentally-appropriate ways
- recognized as experts on their own experiences
- given choices and involved in decision making
- supported within the family context to build skills and strategies for the future
- provided with opportunities to develop and strengthen their peer relationships
- supported to develop healthy identities and skills as young adults

Family focused

A family focused approach:

- embraces the multiplicity of family types and situations
- requires workers to create a partnership with families, and work collaboratively with them
- includes family members in all decision making and planning activities at the level of participation they choose
- acknowledges the family members as the experts on their particular situation
- acknowledges families as the experts on their child's needs and abilities
- assists families to identify their strengths and build family resilience and resources
- involves families as participants in a continuous improvement processes

Prevention and early intervention focused

Prevention:

- is underpinned by education and information
- employs activities and strategies that support and promote individual, family and community wellbeing
- builds capacity
- supports self reliance

Early intervention:

- responds to individuals, families and communities that have displayed early signs of a risk or problem
- aims to minimize the extent of intervention required
- focuses on strengthening resilience
- may include follow up support after an initial intervention has been provided
